

# The essential collaboration platform for all your business needs

## Bringing you closer to your team

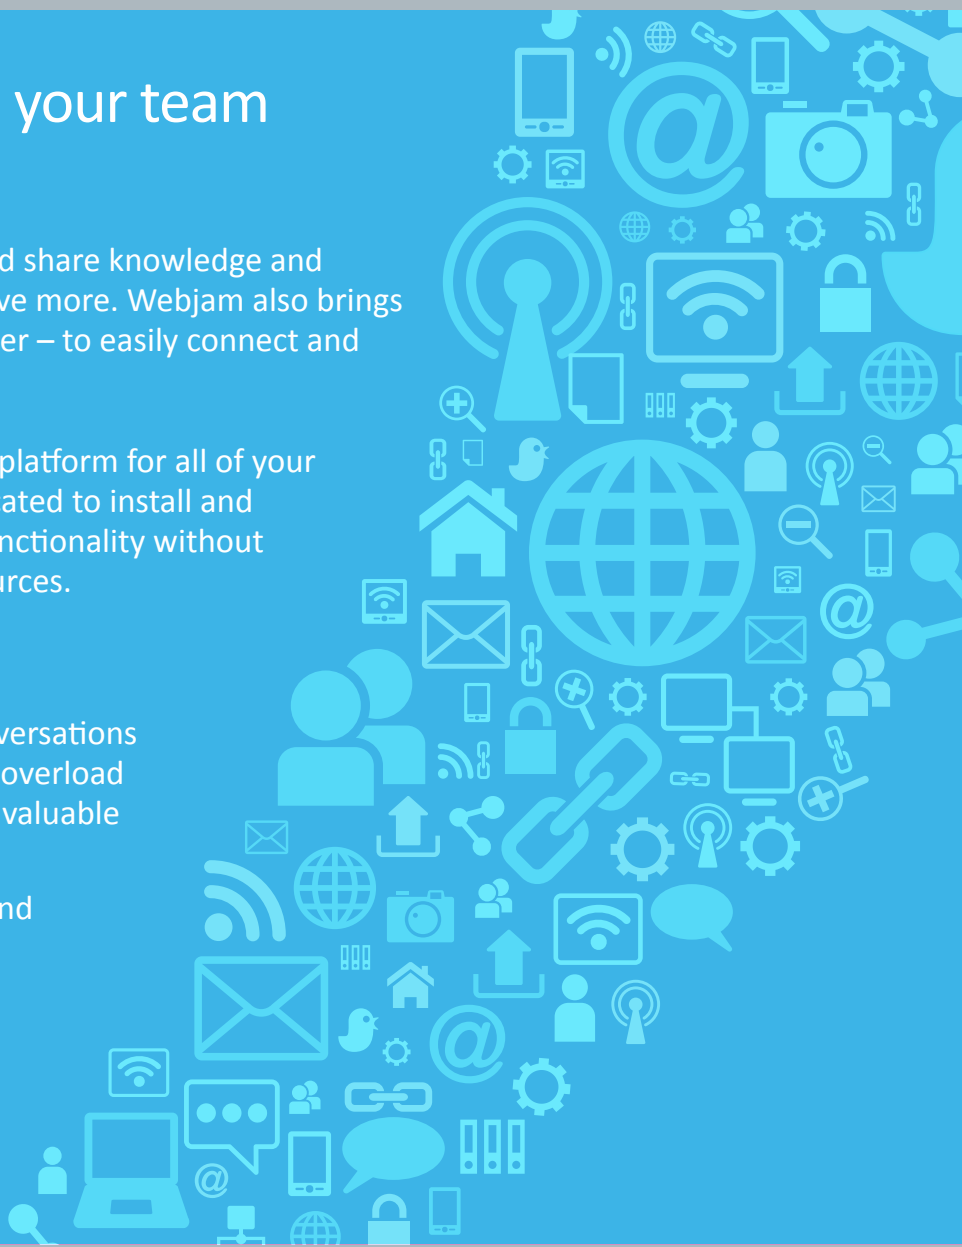

### Who We Are

Webjam equips your teams to find and share knowledge and expertise – working together to achieve more. Webjam also brings you and your customers closer together – to easily connect and share information in real time.

Webjam delivers a fully customisable platform for all of your team's community needs – uncomplicated to install and run – providing a full suite of social functionality without technical knowledge or external resources.

### Your Social Platform

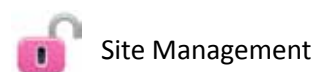

- Packages for managing internal conversations with colleagues and reducing email overload that cuts productivity that eats into valuable time.
- Quickly and easily discover trends and innovative ideas from within your company, identify thought leaders and future stars.
- You'll be able to file share across communities and groups with customisable privacy settings.

## Webjam Features:

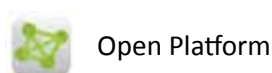

Site Creation

Site Management

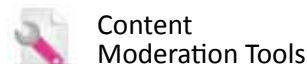

Statistics and Analytics Tools

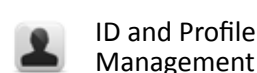

Open Platform

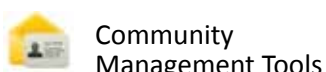

Content and Publishing Tools

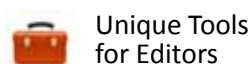

Content Moderation Tools

ID and Profile Management

Community Management Tools

Unique Tools for Editors
